Master Product Requirements Document -- Version 3.0 (Final)

Document Version: 3.0 -- Approved for Build

Date: June 2026

Author: Ayabulela Yokwana, Co-Founder & COO, Propela Health

Platform Name: Propela Ops

Status: Airtight. Hand to Claude Code.

Decision Log (v2 -> v3 changes)

Change	Decision	Source
Institution Tracker renamed	-> Nurse Acquisition Hub (4 tracks)	Aya confirmed
Hospital outreach reframed	Partnership Track -- info sessions, not recruitment	Aya confirmed direction
Nurse card status badge	Readiness Status: Not Ready / Placement Ready / Placed	Aya confirmed
Photos in Phase 1	Photo URL field (paste Google Drive / WhatsApp link)	Aya confirmed
Acquisition Hub tracks	4 tracks: Organisations, Referral Network, Community Channels, Events	Aya confirmed
Dashboard	Splash screen + 1-page summary with Actions Needed count	Aya confirmed
Nurse card visual design	Airtable-style gallery (photo, stars, badges, location)	Aya's screenshot
Motivations + Questions fields	Imported from Cohort 1 CSV on first load, no manual re-entry	Resolved
Lightfield CRM	Phase 3 migration target -- Propela Ops eventually replaces it	Aya confirmed
Open question: Cohort 2 provider	Remains open -- post Cohort 1 learnings document	Stays open

1. Executive Summary

Propela Ops is Aya Yokwana's single operating environment as COO of Propela Health. It replaces Notion for nurse tracking, extends into territory no current tool covers (institutional outreach memory, nurse acquisition tracking, cohort delivery management), and is designed to eventually replace Lightfield CRM in Phase 3.

The platform is built around four principles confirmed by real Propela data:

First, a nurse's record is not just a pipeline stage -- it is a combination of pipeline stage, readiness status, next action, scorecard, and internal flags, all of which must be visible without scrolling.

Second, nurse acquisition happens across four distinct channels (organisations, referrals, communities, events), each with a different relationship logic. Tracking them in one unified hub with filters is more powerful than separate trackers.

Third, hospital partnerships are approached as information-sharing arrangements, not recruitment outreach. Propela does not recruit nurses from hospitals directly -- it hosts information sessions for nurses who are already interested in going international.

Fourth, nothing is deleted. Every nurse record, every outreach log, every flag stays in the system permanently, with clear visual exit states.

2. Problem Statement

2.1 What is broken today

Nurse tracking has no single home. Notion holds the Cohort 1 pipeline. Spreadsheets hold scores. Lightfield holds follow-ups. Gmail holds the communication history. Getting a complete picture of one nurse requires switching between four tools.

The most critical operational field is buried. What does this nurse need from me right now is a text field in a Notion row. It should be the first thing Aya sees on every nurse card, in large type, in colour.

Nurse acquisition has no memory. There is no record of which nursing schools, hospitals, WhatsApp groups, or career fairs were engaged, what happened, what worked, and what to try again next cohort. This knowledge resets every cycle.

Cohort delivery has no dashboard. Tracking 10 nurses through training, OET prep, results, and placement happens manually. There is no view of cohort health, budget consumed, or upcoming milestones.

Dropped and rejected nurses disappear. When a nurse is rejected or drops out, their record becomes inaccessible. This loses relationship history, potential for future cohorts, and data on why the funnel shaped the way it did.

3. Goals and Success Metrics

Goal	Metric	Target (3 months post-launch)
Replace Notion for nurse tracking	Tools used for nurse management	1 (Propela Ops only)
Make Next Action impossible to miss	Time to identify what a nurse needs	Under 30 seconds
Build acquisition memory	Institutions / channels with active records	80+
Keep follow-ups on time	Institution follow-up overdue rate	Under 10%
Real-time cohort visibility	Manual update frequency needed	Zero
Retain all nurse records	Nurse records retained after rejection/dropout	100%

4. Primary User Profile

Ayabulela Yokwana -- Co-Founder and COO, Propela Health

Sole user in Phase 1. Every view, interaction, and default is designed for her workflow.

What Aya needs to be able to do

- Open the platform and see, on one screen, what needs her attention today
- Know exactly what to do next for every nurse in the system
- Log an outreach attempt to an institution in under 30 seconds
- Move a nurse through the pipeline with one action
- See the current cohort's health without opening a spreadsheet
- Review a nurse's full profile (flags, scores, notes, OET status) before making a call
- Find a template that worked last time and use it again
- Never lose a record, even if the nurse dropped out in week one

Tools Propela Ops complements (Phase 1)

Tool	Purpose	Relationship
Lightfield CRM	Employer tracking (demand side)	Stays separate in Phase 1; Phase 3 migration target
Mailchimp / Mailmeteor	Bulk email sending	Propela Ops logs what was sent; does not send
Typeform	Application intake	CSV import on load; future direct import in Phase 2

Tool	Purpose	Relationship
Gmail	Actual email sending	Propela Ops logs the communication; Gmail sends it

5. Product Architecture

PROPELA OPS

— DASHBOARD

Splash screen → 1-page summary: Actions Needed, Cohort Pulse, Acquisition Hub follow-ups, Red Flags, Recent Activity

— NURSE DATABASE

Master record for every nurse Propela has ever engaged

— Gallery View Photo cards, grouped by specialty or stage

— Pipeline View Kanban across all stages

— Cohort View Filtered to active cohort, OET focus

— Nurse Card Full record – all fields, Next Action prominent

— NURSE ACQUISITION HUB

Four tracks, one platform, universal filter

— Track 1: Organisations NEIs + Hospitals (Partnership approach)

— Track 2: Referral Network Placed nurses and active referrers

— Track 3: Community Channels WhatsApp groups, Facebook, DENOSA

— Track 4: Events Career fairs, info sessions, roadshows

— COHORT MANAGER

One card per cohort, live nurse progress table, budget tracker

— OUTREACH LOG + TEMPLATE LIBRARY

Aggregated log across all acquisition tracks, template store

6. Module 1 -- Dashboard

6.1 Splash Screen

Displayed on first open each session. Auto-transitions after 1.5 seconds or on click.

- Full screen, Propela purple (#5B2D8E) background
- Propela logo centred, with "Ops" as a secondary label
- Aya's name below the logo
- Subtle fade-in animation
- One tap anywhere skips to dashboard

6.2 Main Dashboard (1 page, no scroll required on desktop)

Top bar:

Propela Ops logo (small, left) + "Good morning, Aya" with today's date + Quick-add button (+ New Nurse, + Log Outreach)

Row 1: Action Metrics (4 tiles)

Tile	Content	Colour logic
Actions Needed	Total nurse cards with an overdue or due-today Next Action	Red if > 0, green if clear
Active Nurses	Nurses in the pipeline (excluding Placed and exited)	Propela purple
Cohort Status	Active cohort name + status badge	Status colour
Hub Follow-ups	Institutions / channels with a follow-up due today or overdue	Amber if > 0

The Actions Needed tile is the most visually dominant. Largest number on the page.

Row 2: Two-column layout

Left column (60%) -- Actions Panel

"Nurses needing action" -- a prioritised list grouped into three sections:

- OVERDUE (red) -- nurses whose Next Action has passed the follow-up date
- DUE TODAY (amber) -- nurses with Next Action due today
- UPCOMING (grey) -- next 3 days

Each row shows: nurse photo (small circle), name, Next Action label, days since last contact. Click opens nurse card directly.

Right column (40%) -- Cohort Pulse

Active cohort card showing:

- Cohort name + status badge
- Enrolled vs. target (e.g., 9/10)
- OET status bar: Not Started / Studying / Registered / Passed / Failed (colour blocks)
- Commitment fees: Paid / Pending / Overdue (colour blocks)
- Next milestone + days remaining
- Budget: amount spent vs. total (progress bar)

Row 3: Two-column layout

Left column -- Red Flags

All nurse cards with one or more unresolved [FLAG] flags. Name, flag count, last contacted. Click opens nurse card. Empty state: "No active flags."

Right column -- Recent Activity

Last 10 logged actions across all modules. Timestamped. Icons for type (nurse update, outreach sent, cohort change, template used).

7. Module 2 -- Nurse Database

7.1 Purpose

Single source of truth for every nurse Propela has engaged -- from first application to placement or permanent exit. Replaces Notion entirely.

Capacity: 500 nurses

7.2 Nurse Pipeline Stages

Application Funnel (pre-cohort selection)

Stage	Description
Applied	Typeform submitted. Basic details only.
CV Submitted	CV received. Awaiting EF SET result.
CV + English Submitted	Both CV and EF SET received. Ready for scoring.
Under Review	Scoring in progress. Shortlist decision pending.
Shortlisted -- Yes	YES ✓ confirmed. Awaiting interview.
Shortlisted -- Maybe	MAYBE. Requires further review or follow-up.
Not Selected	NO ✗. Non-selection email required.
Didn't Qualify	Failed minimum criteria at intake.

Cohort Pipeline (post-selection)

Stage	Description
Selected for Cohort	Offered a place. Agreement not yet signed.
Reserve	On waitlist. First contact if a place opens.
Cohort Confirmed	Agreement signed. Commitment fee received. Active member.
Training Active	Currently attending OET Fast Track.
OET Registered	Exam date confirmed and booked.
OET Passed	All four components passed.
OET Failed	One or more components failed. Retake track.

Stage	Description
Placement Ready	OET passed, documents complete, available for matching.
Placed	Matched to employer. Placement confirmed.

Exit and Hold States

Stage	Visual	Description
Deferred	Yellow card	Agreed to join a future cohort. Relationship active.
Dropped Out	Red card + [FLAG]	Withdrew. Record retained permanently. Never hidden.
Recommended Pathway	Grey card	Directed to English training, RN qualification, or future cohort.
Not Selected	Muted card	Funnel rejection. Retained for future cohort consideration.

7.3 Readiness Status Badge

Displayed prominently on every nurse card in gallery and pipeline view. Auto-calculated from pipeline stage.

Status	Colour	Triggered by stage
Not Ready	Grey	Applied through OET Registered
Placement Ready	Green	OET Passed, Placement Ready
Placed	Propela Purple	Placed

Exit states (Dropped Out, Deferred, Recommended Pathway) show their own stage label as the badge, not a Readiness Status.

7.4 Gallery View (default -- Airtable-style)

Nurse cards displayed as a photo gallery. Default grouping: by Primary Clinical Specialty. Alternative groupings: Pipeline Stage, Cohort, Readiness Status.

Each gallery card displays:

```
[
  [PHOTO – circular crop] |
  Full Name |
  [CV Score stars] |
  [Yrs badge] [Specialty] |
  [City, Province] |
  [Readiness Status badge] |
  [Next Action badge] |
]
```

|  x2 (if flags exist) |

- Photo: loaded from Photo URL field. If no URL, initials avatar with Propela purple background.
- CV Score: 1-5 star display (half-stars supported)
- Years badge: number in a coloured circle (matches Airtable style)
- Next Action badge: colour-coded -- red if overdue, amber if due today, teal if no urgency, grey if no action required
- Flag indicator: only shown if [FLAG] count > 0. Red icon with count number.

Gallery controls:

- Group by (dropdown)
- Filter (panel: Cohort / Stage / Specialty / Readiness Status / Next Action / Flag present / EF SET Level / OET Status / Province)
- Search (name, email, SANC number)
- Sort (Name / CV Score / Years Experience / Last Contacted / Submitted Date)
- View toggle: Gallery / Pipeline Kanban / Table

7.5 Pipeline Kanban View

Same data as gallery, displayed as a Kanban. One column per stage. Cards are draggable between stages. Card drag updates the pipeline stage field and prompts Next Action update.

Kanban card (compact):

- Circular photo (small)
- Name
- Next Action badge
- Readiness Status badge
- [FLAG] count (if > 0)

7.6 Cohort View

Filtered view of the nurse database showing only nurses assigned to the selected cohort. OET and commitment fee status are the primary columns.

Column	Type
Photo + Name	Link to full card
Pipeline Stage	Badge
Next Action	Colour badge
OET Status	Badge
OET Scores	W / S / L / R (4 numbers, colour-coded pass/fail)
Commitment Fee	Badge (Paid / Pending / Overdue)

Column	Type
Agreement Signed	Checkbox display
[FLAG] Flags	Count
Last Contacted	Date

7.7 Nurse Card -- Complete Field Specification

CARD HEADER (always visible, no scroll)

Field	Type	Display
Profile Photo	URL (Google Drive / WhatsApp link)	Circular crop, top of card
Full Name	Text	Large, prominent
Preferred Name	Text	Smaller, in brackets
Pipeline Stage	Dropdown	Badge below name
Next Action	Dropdown (see values)	Large colour badge -- most prominent element
Readiness Status	Auto-calculated	Colour badge
[FLAG] Flag Count	Auto (from Notes / Flags)	Red icon, count number
Last Contacted	Date	Auto-updated
Cohort	Link to Cohort record	Tag
Submitted At	DateTime	Small, below name

Next Action dropdown values:

Needs: Chase CV, then scoring
 Needs: Chase EF SET, then shortlist email
 Needs: Shortlist email (writing task)
 Needs: Non-selection email
 Needs: Non-selection email (English pathway)
 Needs: Review
 Needs: Send agreement
 Needs: Chase commitment fee
 Needs: OET registration
 Needs: Chase OET results
 Needs: Placement outreach
 No action required
 [Custom – free text]

PERSONAL INFORMATION

Field	Type
Email Address	Email
Contact Number	Phone (WhatsApp-first)
Gender	Dropdown: Female / Male / Non-binary / Prefer not to say
Age Group	Dropdown: 25-29 / 30-35 / 35-40 / 40+
Province / City	Text

PROFESSIONAL PROFILE

Field	Type	Notes
Registered with SANC	Yes / No	
Registered Nurse in South Africa	Yes / No	
SANC Registration Number	Text	e.g., 16081978
SANC APC Expiry Date	Date	
SANC APC Status	Dropdown: Active / Lapsed / Unverified	
Highest Qualification	Dropdown: Diploma / Bachelor's Degree / Postgraduate / Bachelor's + Postgrad / Other	
Qualification Institution	Text + optional link to Org record	
Years of Clinical Experience	Dropdown: Less than 1 year / 1-2 years / 3-5 years / 5+ years	Displayed as years badge on card
Primary Clinical Specialty	Dropdown: Medical/Surgical / ICU / Theatre / Paediatrics / Midwifery / Mental Health / Emergency / Oncology / PHC-Community / Maternity / Renal / Other	Used for gallery grouping
Additional Certifications	Multi-text	ACLS, PALS, BLS, etc.
Employment Status	Dropdown: Employed / Unemployed / Freelancing / Prefer not to say	
Current Employer	Text + optional link to Organisation record	
Valid Passport	Yes / No	
Passport Expiry Date	Date	

ENGLISH PROFICIENCY -- SCREENING (EF SET)

Field	Type
Previously Taken English Test	Yes / No
EF SET Score	Number (0-100)
EF SET Level	Dropdown: A1 / A2 / B1 / B2 / C1 / C2
English Pts (0-3)	Number (feeds scorecard automatically)
English Proficiency Level (CEFR)	Dropdown (overall summary level)

ENGLISH PROFICIENCY -- QUALIFICATION (OET)

Field	Type
OET Status	Dropdown: Not Started / Studying / Registered / Sat / Passed / Failed / Exemption Pending
OET Exam Date	Date
OET Exam Centre	Text
OET Writing Score	Number
OET Speaking Score	Number
OET Listening Score	Number
OET Reading Score	Number
OET Overall Result	Dropdown: Pass / Fail / Partial
Retake Required	Yes / No
Retake Components	Multi-select: Writing / Speaking / Listening / Reading

SCORECARD

Scores are entered manually. Final Score and Tier are auto-calculated.

Criterion	Weight	Input
Hospital Experience	x3	1-5
SANC Registration Status	x3	1-5
English Proficiency	x2	Auto from English Pts field
Qualifications	x2	1-5
Specialisation	x1	1-5
Valid Passport	x1	1-5
Financial Readiness	x1	1-5
Motivation	x2	1-5 (entered post-interview)

CV Score: Auto-calculated from Hospital Exp, SANC, Qualifications, Specialisation only (pre-interview components). Displayed as stars on gallery card.

Final Score: Sum of all weighted scores ÷ 15 = out of 5.0

Tier (auto-assigned):

Score	Tier
4.0 - 5.0	Tier 1 Priority
3.0 - 3.9	Tier 1 Standard
2.0 - 2.9	Tier 2 Development
1.0 - 1.9	Tier 3
Below 1.0	Not Suitable

SELECTION AND PATHWAY

Field	Type
Shortlist Decision	Dropdown: YES ✓ / MAYBE / NO ✗
First Interview Date	Date
Non-Selection Reason	Text
Recommended Pathway	Dropdown: Obtain RN qualification, reapply / Self-funded English training, reapply at B2+ / Waitlisted for future cohort / Included in current cohort / Other

COHORT AND COMMITMENT

Field	Type
Cohort Assigned	Link to Cohort record
Agreement Sent	Yes / No
Agreement Sent Date	Date
Agreement Signed	Yes / No
Agreement Signed Date	Date
Commitment Fee Status	Dropdown: Not Due / Invoiced / Paid / Refunded / Waived / Overdue
Commitment Fee Date Paid	Date

PLACEMENT

Field	Type
Placement Status	Dropdown: Not Ready / Ready / In Process / Placed / Declined
Destination Country	Dropdown: UK / Ireland / Other
Employer	Text
Placement Date	Date
Placement Fee Invoiced	Yes / No
Placement Fee Received	Yes / No

NOTES, FLAGS, SOURCE, AND COMMS

Field	Type	Notes
Motivations	Long text	From application. Imported from CSV.
Questions (from applicant)	Long text	From application. Imported from CSV.
Notes / Flags	Rich text	Aya's internal notes. [FLAG] typed manually creates a counted flag in the card header.
Source	Dropdown: Direct application / Organisation referral / Community channel / Referral from placed nurse / Event / LinkedIn / WhatsApp / Word of mouth / Other	
Source Record	Link to Acquisition Hub record (any track)	
Communication Log	Chronological entries	Date, channel, summary, next action set

7.8 Data Seed -- Cohort 1 CSV Import

On first load, the Cohort 1 Notion Merged CSV is imported automatically. Field mapping:

CSV Column	Propela Ops Field
Name	Full Name

Didn't Qualify	--	Didn't Qualify

8. Module 3 -- Nurse Acquisition Hub

8.1 Purpose

Track every channel through which Propela finds nurses. Four tracks, one platform, universal filter and shared outreach log. Builds acquisition memory that compounds across cohort cycles.

Capacity: 300 records across all tracks

Important framing for hospital outreach: Propela does not contact hospital HR departments to recruit nurses. The approach is a Partnership Track -- Propela partners with a nursing manager or matron to host a voluntary information session for nurses already curious about international careers. The nurses opt in. The outreach message to the hospital contact is: "We'd love to host a 30-minute information session for any of your nurses interested in working abroad."

8.2 Shared Outreach Pipeline (all 4 tracks)

Stage	Description
Identified	In the database, no outreach yet
Outreach Sent	First contact made
Follow-Up Pending	Sent, no response, follow-up date set
Responded	Contact replied
Engaged / Meeting Set	Call, session, or visit confirmed
Active	Ongoing relationship generating nurse leads
Dormant	Previously engaged, no current activity
Closed	Not viable -- do not re-engage

8.3 Track 1 -- Organisations

Covers both Type A (Nursing Education Institutions) and Type B (Health Facilities / Hospitals). Filtered by subtype within the track.

Shared organisation fields:

Field	Type
Organisation Name	Text (required)
Organisation Type	Dropdown: NEI / Health Facility
Province	Dropdown (all 9 SA provinces)
City / Town	Text
Physical Address	Text
Primary Contact Name	Text
Contact Email	Email
Contact Phone	Phone
LinkedIn / Website URL	URL
Current Stage	Auto (from pipeline)
Last Contact Date	Date (auto-updated on outreach log)
Next Follow-Up Date	Date (triggers Dashboard alert)
Preferred Channel	Dropdown: Email / LinkedIn / Phone / WhatsApp / In-person
Nurses Sourced (count)	Auto (linked nurse records where Source = this org)
Internal Rating	1-5 stars
Notes	Rich text
Tags	Multi-select

Type A -- NEI only:

Field	Type
SANC Accreditation Type	Dropdown: University / Public College / Private NEI
Programmes Offered	Multi-select: Auxiliary (NQF5) / Diploma (NQF6) / Bachelor's (NQF8) / Postgrad
Approximate Annual Graduates	Number
SANC Reference Number	Text

Type B -- Health Facility only:

Field	Type
Healthcare Group	Dropdown: Life Healthcare / Mediclinic / Netcare / Public / Independent / Other
Facility Type	Dropdown: Private / Public
Overview / Description	Long text
Outreach Approach	Dropdown: Info Session Partnership / Job Fair Presence / Nurse Referral Agreement / Other
Info Session Held	Yes / No
Info Session Date	Date
Nurses Attending Info Session	Number
Nurses Converted to Applicants	Number (auto-linked)

Data seed on load: All 108 records from Health Facilities CSV are imported as Type B organisations in Track 1.

8.4 Track 2 -- Referral Network

Individual people who refer nurses to Propela. Primary source: nurses from previous cohorts who have been placed.

Field	Type
Referrer Name	Text
Referrer Type	Dropdown: Placed Nurse / Nursing Colleague / Healthcare Professional / Community Leader / Other
Link to Nurse Record	Link (if they are also in the nurse database)
Contact Email	Email
Contact WhatsApp	Phone
Province / Location	Text
Current Relationship Stage	Dropdown (shared pipeline)
Nurses Referred (count)	Auto (linked nurse records where Source = this referrer)
Nurses Converted (count)	Auto (linked nurses who reached Cohort Confirmed stage or beyond)
Conversion Rate	Auto-calculated
Last Referral Date	Date
Notes	Text
Tags	Multi-select

8.5 Track 3 -- Community Channels

WhatsApp groups, Facebook groups, nursing associations, LinkedIn groups, forums.

Field	Type
Channel Name	Text (e.g., "SA Nurses Abroad Facebook Group")
Channel Type	Dropdown: Facebook Group / WhatsApp Group / Professional Association / LinkedIn Group / Online Forum / Other
Platform	Dropdown: Facebook / WhatsApp / LinkedIn / Website / In-person / Other
URL / Link	URL
Estimated Reach (members)	Number
Admin / Moderator Name	Text
Admin Contact	Text
Access Status	Dropdown: Member / Pending / Not Joined
Post Permission	Dropdown: Open / Admin approval / No posting allowed
Current Stage	Dropdown (shared pipeline)
Last Posted Date	Date
Last Post Outcome	Dropdown: No response / Some engagement / Good response / Nurse leads generated
Nurses Sourced (count)	Auto
Notes	Text

8.6 Track 4 -- Events

Career fairs, Propela-hosted information sessions, nursing conferences, roadshows, online webinars.

Field	Type
Event Name	Text
Event Type	Dropdown: Career Fair / Info Session (Propela-hosted) / Info Session (at hospital) / Nursing Conference / Roadshow / Online Webinar / Other
Organiser	Text
Event Date	Date
Location	Text (City, Province or Online)
Status	Dropdown: Planned / Registered / Attended / Hosted / Completed / Missed

Field	Type
Nurses Met	Number
Nurse Cards / Materials Distributed	Yes / No
Leads Generated (count)	Number
Nurses Converted to Applicants	Auto-linked
Notes / Outcome	Long text
Budget (if Propela hosting)	Currency (ZAR)
Follow-Up Required	Yes / No
Follow-Up Date	Date

8.7 Shared Outreach Log (all tracks)

Every contact attempt is logged chronologically per record.

Field	Type
Date	Date
Channel	Dropdown: Email / LinkedIn / Phone / WhatsApp / In-person / Other
Contact Person	Text
Template Used	Link to Template Library
Subject Line (if email)	Text
Message Summary	Text
Outcome	Dropdown: No response / Bounced / Responded positive / Responded neutral / Declined / Session booked / Leads received
Follow-Up Date	Date
Notes	Text

9. Module 4 -- Cohort Manager

9.1 Purpose

Track each cohort as a discrete delivery project, from planning through to final placement outcomes and documented learnings.

9.2 Cohort Card Fields

Identity and Status

Field	Type
Cohort Name	Text (e.g., "Cohort 1 -- May 2026")
Status	Dropdown: Planning / Recruiting / Training / OET Prep / Exam Window / Placement / Closed
Source Countries	Multi-select
Target Nurses	Number
Enrolled Nurses	Auto (count of nurses at Cohort Confirmed and beyond)
Reserve List Count	Auto (count at Reserve stage)

Timeline

Field	Type
Recruitment Open	Date
Recruitment Close	Date
Training Start	Date
Training End	Date
OET Exam Date (Target)	Date
OET Results Expected	Date
Target First Placement	Date

Training Provider

Field	Type	Note
Provider Name	Text	
Provider Contact	Text	
Training Format	Dropdown: In-person / Remote / Hybrid	
Training Cost Per Nurse (ZAR)	Currency	
Total Training Cost	Auto	
Lessons Planned	Number	
Formal Assessment Included	Yes / No	[!] Cohort 1 learning: non-negotiable for Cohort 2
Pre/Post Proficiency Tracking	Yes / No	[!] Cohort 1 learning: required
Per-Candidate Progress Reports	Yes / No	[!] Cohort 1 learning: required
Exam Readiness Criteria Defined	Yes / No	[!] Cohort 1 learning: required

Field	Type	Note
Provider Notes	Long text	

Budget

Field	Type
Total Budget (ZAR)	Currency
Propela Contribution	Currency
Commitment Fees Collected	Auto (sum from linked nurse records)
Training Cost (Actual)	Currency
OET Exam Cost (Actual)	Currency
Other Costs	Currency
Total Spent	Auto
Budget Remaining	Auto

Outcomes

Field	Type
OET Pass Rate (Target)	% (default 80%)
OET Pass Rate (Actual)	Auto-calculated
Placement Rate (Target)	% (default 70% of passers)
Placement Rate (Actual)	Auto-calculated
Total Placement Fees Earned	Currency
Cohort Learnings	Long text -- post-cohort review

9.3 Cohort Nurse Progress Table

Inline Cohort View within the cohort card. Live table of all enrolled nurses. Same columns as Cohort View in Nurse Database. Changes update the main nurse record immediately.

10. Module 5 -- Outreach Log and Template Library

10.1 Aggregated Outreach Log

All outreach entries across all four acquisition tracks, in one searchable table.

Additional columns beyond per-record log:

- Track (Organisation / Referral Network / Community Channel / Event)

- Organisation Type (NEI / Health Facility, if Track = Organisation)
- Province
- Cohort Cycle

Filters: Date range / Track / Channel / Outcome / Province / Cohort Cycle

Sort: Date / Outcome / Track / Record name

10.2 Template Library

Field	Type
Template Name	Text
Template Type	Dropdown: Cold outreach / Follow-up / Partnership ask / Info session invite / Thank you / Re-engagement
Best Track	Multi-select: Organisation / Referral / Community / Event
Channel	Dropdown: Email / LinkedIn / WhatsApp
Subject Line	Text (email only)
Body	Rich text
Times Used	Auto-incremented
Response Rate	Auto (positive outcomes ÷ uses)
Last Used Date	Auto
Best Used For	Text
Status	Dropdown: Active / Archived

10.3 Channel Performance (read-only analytics)

- Outreach attempts by channel (bar chart)
- Response rate by channel
- Top 5 templates by response rate
- Nurses sourced by acquisition track
- Monthly outreach volume over time

11. Data Relationships

12. Key User Flows

Flow A -- Morning dashboard routine

1. Open Propela Ops -- splash screen, 1.5s
2. Dashboard loads. Actions Needed tile shows 6
3. Actions Panel -- 2 overdue, 4 due today
4. Click first overdue nurse -- card opens
5. Review Notes / Flags. Read Motivations.
6. Confirm YES decision. Update Next Action to "Needs: Shortlist email (writing task)"
7. Log comm entry: date, channel = Email, notes
8. Move pipeline stage: Under Review -> Shortlisted -- Yes
9. Next Action badge updates. Dashboard count drops to 5.

Flow B -- Adding a hospital as a partnership target

1. Open Nurse Acquisition Hub -> Track 1: Organisations
2. Most 108 seeded hospitals already here. Find target hospital.
3. Open card. Update Outreach Approach = "Info Session Partnership"
4. Log outreach: channel = LinkedIn, message = info session invite template
5. Set follow-up date = +5 days
6. Stage moves to Outreach Sent
7. Dashboard Hub Follow-ups tile updates

Flow C -- Logging a Community Channel engagement

1. Open Hub -> Track 3: Community Channels
2. Add new channel: "SA Nurses UK Facebook Group", platform = Facebook, est. reach = 4,200
3. Join the group. Update Access Status = Member. Post Permission = Open
4. Post about Propela Cohort 2 applications
5. Log outreach entry: channel = Facebook, outcome = Good response, leads generated = 3
6. Update stage: Identified -> Active

7. Link new applicants who mention the group in their Source field

Flow D -- Reviewing cohort health mid-cycle

1. Open Cohort Manager -> Cohort 1
2. Review cohort pulse: 8 nurses in Training Active, 1 dropped out (red card visible)
3. OET bar: 8 Not Started (exam date approaching)
4. Budget remaining: R12,400 of R90,000
5. Drill into nurse table. Filter by Commitment Fee = Overdue
6. 1 nurse flagged. Open her card. Next Action = "Needs: Chase commitment fee"
7. Log call. Update fee status pending confirmation.

13. Design Principles

Brand:

- Primary: Propela Purple #5B2D8E
- Font: Poppins throughout
- Module accent colours: Nurse Database = teal, Organisations = orange, Community = emerald, Referral = coral, Events = indigo, Cohort = deep purple
- Visual quality must be premium -- startup-grade, not a scratchpad

Next Action is the most prominent element on every nurse card. Colour, size, and position reflect urgency. Red = overdue. Amber = due today. Teal = upcoming. Grey = no action.

Readiness Status is the second most prominent badge. Not Ready (grey), Placement Ready (green), Placed (purple).

Flags are never hidden. Red card background for Dropped Out. Flag count in card header wherever flags exist. Dashboard Red Flags feed catches stragglers.

Nothing is deleted. Exit states are permanent records. The filter can exclude them from view, but the default includes them.

One action = one click or drag. Pipeline stage change: drag the card. Next Action update: single dropdown select. Outreach log: one form, under 30 seconds.

Photo-first gallery. The gallery view is the default nurse view. It is designed to mirror the Airtable NurseSync visual Aya built -- photo, stars, badges, location -- adapted for international placement context.

Mobile-aware for key actions. Dashboard, nurse card header, and outreach log must function on mobile. Full table and gallery views are desktop-first.

14. Scope Boundaries

Phase 1: In Scope (this build)

- All five modules fully functional
- Single-user (Aya only)
- Manual data entry + CSV import on load (Cohort 1 nurses + Health Facilities)
- Auto-calculations: CV Score, Final Score, Tier, OET pass rate, budget remaining, nurses sourced counts
- Persistent storage across sessions
- Gallery, Kanban, and Table views for nurse database
- Template library with effectiveness tracking
- 4-track Acquisition Hub
- Splash screen + 1-page dashboard

Phase 1: Out of Scope

- Vuyo-facing employer / demand side
- API integrations (Mailchimp, Lightfield, Typeform)
- Automated email sending
- Nurse-facing or institution-facing portals
- Document storage (CVs, passports, certificates)
- Actual image file upload (photo URL only)

15. Build Phases

Phase 1 -- MVP Artifact (Claude Code)

Build priority order:

1. Nurse Database (Gallery + Kanban + Card) -- replaces Notion now
2. Cohort Manager -- Cohort 1 is live
3. Nurse Acquisition Hub (4 tracks) -- institution outreach
4. Dashboard (Splash + 1-page summary) -- built after modules have real data
5. Template Library -- added in final pass

Tech stack:

- React with hooks (useState, useReducer)
- Tailwind CSS (base utility classes)
- Recharts (analytics views)
- Lucide React (icons)
- window.storage (Claude persistent storage API) -- data persists across sessions

CSV data seeding on first load:

- Cohort 1 Notion Merged CSV -> 67 nurse records with full field mapping
- Health Facilities CSV -> 108 Organisation records (Type B, Track 1)

Phase 2 -- Enhanced Ops

- CSV import for new Typeform application batches
- Follow-up reminder notifications
- Multi-cohort analytics (pass rate trends)
- Bulk Next Action update
- Nurse record duplicate detection (name + email)
- Export to CSV for Mailmeteor mail merges

Phase 3 -- Multi-user + Lightfield Migration

- Vuyo-facing BD module (employer demand side)
- Role-based access: Aya = Ops view, Vuyo = BD view
- Lightfield CRM data migration into Propela Ops
- Integration layer: Typeform direct sync
- Full developer API documentation and handoff

16. Remaining Open Questions

Question	Impact	Owner
Cohort 2 training provider requirements (formal assessment checklist)	Affects provider field completeness in Cohort Manager	Aya -- post Cohort 1 learnings doc
7th and 8th Next Action values	Minor field update	Aya -- add when recalled

Appendix A -- Scorecard Reference

Criterion	Weight	Max Weighted Score
Hospital Experience	x3	15
SANC Registration Status	x3	15
English Proficiency	x2	10
Qualifications	x2	10
Specialisation	x1	5
Valid Passport	x1	5
Financial Readiness	x1	5
Motivation	x2	10
Total divisor	÷15	5.0 max

Appendix B -- Readiness Status Auto-Calculation

Pipeline Stage	Auto Readiness Status
Applied through OET Registered	Not Ready (grey)
OET Passed, Placement Ready	Placement Ready (green)
Placed	Placed (Propela purple)
Dropped Out	Dropped Out badge (red)
Deferred	Deferred badge (yellow)
Not Selected, Recommended Pathway	Stage label shown as badge

Appendix C -- Colour Reference

Element	Colour
Primary / Brand	#5B2D8E (Propela Purple)
Next Action -- Overdue	Red (#EF4444)
Next Action -- Due Today	Amber (#F59E0B)
Next Action -- Upcoming	Teal (#0D9488)
Next Action -- No action	Grey (#9CA3AF)
Readiness: Not Ready	Grey (#6B7280)
Readiness: Placement Ready	Green (#10B981)
Readiness: Placed	Propela Purple (#5B2D8E)
Dropped Out card	Red background (#FEE2E2)
Deferred card	Yellow background (#FEF9C3)
Flag indicator	Red (#DC2626)
Nurse module accent	Teal (#0D9488)
Organisation accent	Orange (#F97316)
Community accent	Emerald (#059669)
Referral accent	Coral (#F43F5E)
Events accent	Indigo (#6366F1)
Cohort accent	Deep purple (#7C3AED)

Propela Health | Propela Ops v3.0 | Internal Document | Confidential

Approved for Claude Code Build | June 2026
